1406/1407 WICKELSTAR II – FLEECE WINDER

METASA
CURVE. PRECISION. MASTERY.

The fleece winder makes it easier to grow and tend to strawberries and vegetables, and is suitable for unwinding and winding fleece, netting and lightweight plastic sheeting. The sturdy frame construction allows for pipes up to 2500 mm in diameter (item nos. 1407 to 2000 mm). The hydraulic drive and automatic winding mechanism are conveniently controlled from the tractor. A front loader adapter is available as an option, ideal for laying plastic sheeting in tunnel and hail protection systems. Ball-bearing-mounted pipe supports ensure smooth running without rattling and guarantee gentle handling of fleece and plastic sheeting.
