

1459.02 | ProfiStar chopping frame

4-row version

Article number: 1459.02

 Weight*: approx. 1750 kg

 Dimensions*: 4332 x 1465 x 1443 mm (b x h x w)

Highlights

- ✓ Can be used for soil and ridge cultivation
- ✓ CAT2/3 selected for receptacles
- ✓ Large 460 mm disc coulters
- ✓ Can be used as front and rear attachment
- ✓ No additions necessary with straw insert
- ✓ Can be hitched to combinations
- ✓ Heavy cultivator handle with goose foot coulters
- ✓ Tools are infinitely adjustable

Art. no.: additional articles

1440	hifting frame
1450	ProfiStar, 3-row
1459.01	breakage bar, 3-row
1459.06	corrugated disc frame
1459.20	finger hoe

Chopping frame with disc coulters as front frame:

The core competence of the Metasa chopping frame, from the Profi Star series, is the mechanical weed control in and between the crop row. The hoe frame can be combined with other devices (e.g. row loosener, 3-row) from the ProfiStar series.

The receptacles are selected in CAT 2/3 and the strong tubular frame constructions **are equipped with StVZO warning signs.**

The six hardened, Ø 460 mm disc coulters **with anti-twist device** are additionally height-adjustable and run true to track in the edge area of the crop. Straw-covered alleys can be worked with the 9 staggered dovetail coulters without pushing them open. Furthermore, all tools can be positioned steplessly on each bar. A useful aid is the attached measurement scale. Version also available as 2-row and 4-row (foldable).

*Production-related tolerances are possible in the specified data, weights and dimensions. No legally binding assurances of specific properties can be derived from this information. Errors and omissions excepted.

 **Made in Germany**

Suitable for the following crops:

Strawberries

Vegetables

Cup-plant
