The Muli I Solo extra from the trusted Muli series can be used to transport harvests of various crops. Due to its stable angular construction, it is recommended mainly for asparagus harvest transport. It can be used to stack **two 440x300 mm** boxes without slipping. Other box dimensions can also be used but are not fixed in the frame. Muli I Solo extra features an easily accessible bolted handle. The profiled wheels are excellently suited to the edges of asparagus fields. Thanks to its large, puncture-proof wheels with roller bearings, it provides excellent weight balance.
