Muli I Trio from the trusted Muli series can be used to transport harvests of various crops.

Due to its stable angular construction, it is recommended mainly for asparagus harvest transport. Different box dimensions (e.g. 1 x 60 x 40 and 1 x 40 x 30 mm) can be stacked on it without risk of slipping.

Muli I Trio features an easily accessible bolted handle. The profiled wheels are excellently suited to the edges of asparagus fields. Thanks to its large, puncture-proof slide-bearing wheels, it provides excellent weight balance.
