

### Article number: 1454

Weight\*: approx. 550 kg

Dimensions\*: 2300 x 1900 x 1400 mm (b x h x w)

#### Highlights

- ✓ Powder-coated finish and active parts galvanised
- ✓ Hollow disc Ø 710 mm and breakage roller are roller-mounted
- ✓ Multi-row capable
- ✓ Optimum row adjustment without measuring equipment
- ✓ Robust frame
- ✓ Clean cutting – no soil breakage

#### Art. no.: additional articles

- |         |   |
|---------|---|
| 1450.01 | breakage roller as tube variant               |
| 1450.02 | breakage roller as flat iron variant          |
| 1454.04 | hollow disc unit for outer row (double discs) |
| 1454.05 | trailer hoe with 5 spring tines               |
| 1455.01 | ridge former                                  |

### Powerful, efficient and clean

The Profi Star Maxi from Metasa is the robust model from the Profi Star series. The unit enables areas to be loosened even more intensively for a high ground coverage.

As with all Profi Star units from Metasa, the deep mandrel, hollow discs and downstream modules form an intelligent unit.

The individual work units can be **adjusted separately in height**. In the same way, the gauge can be easily adapted to individual row widths. Due to the **applied dimensional scaling**, you require no further measuring equipment.

**The special feature:** Profi Star Maxi is a combination attachment. Tillage, mounding and weed control in young plants can be done with one device.

The solid workmanship including **powder coating and galvanised active parts** make the Profi Star Maxi an complete professional unit.

\*Production-related tolerances are possible in the specified data, weights and dimensions. No legally binding assurances of specific properties can be derived from this information. Errors and omissions excepted.

**Made in Germany**

#### Suitable for the following crops:
