1021 DRAHT-SUBSTRATE DAM 1- & 2-ROW

METASA
CURVE. PRECISION. MASTERY.

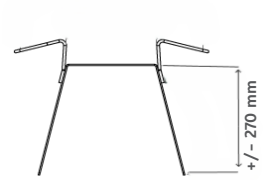

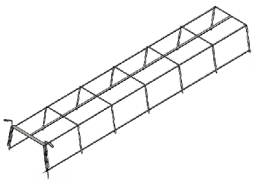

The Metasa wire substrate bed is one of the innovative system solutions for modern horticulture. The metal support structure is installed on the ground and is therefore unaffected by waterlogging and difficult soil conditions. This significantly reduces the need for labour-intensive groundwork and the use of heavy levelling equipment.
As an alternative to conventional substrate application, the Metasa wire substrate bed is suitable for use with both substrate bags and container systems.
Irrigation is carried out efficiently via drip hoses or individual drippers. By optionally covering the wire bed with plastic sheeting, heat is stored during the day and released to the plants in a controlled manner at night. This promotes optimal plant growth and improves temperature stability in the root zone. In addition, Metasa offers customised tie-wire brackets, tailored to the specific plant growth requirements. These can be easily retrofitted to the wire bed.

WIRE SHAPE VARIANTS

1-Row

2-Row

- + CONTAINER SIZES FROM 8 TO 16 LITRES
- + MADE TO ORDER
- + MAKES HARVESTING AND PLANTING EASIER
- + GALVANISED / VINE TIE HOLDER
- + STURDY END PIECES

SUITABLE FOR THE FOLLOWINGCROPS

Strawberries

ART.-NR.	ADDITIONAL ARTICLES
1025.25.07	MetaWave Substrate container 8 Ltr.
1025.25.07	MetaWave Substrate container 11 Ltr.
1025.25.02	MetaWave Substrate container 16 Ltr.
