1036.02 DELPHIN ALTO III RACK - TROLLEY

METASA
CURVE. PRECISION. MASTERY.

The Delphin Alto III is the model in the Delphin series on which three crates can be stacked side by side. Its sturdy square-tube construction makes it the ideal picking trolley for harvesting raspberries and other bush berries. The Delphin Alto III features easily accessible handles. On the upper loading level, three crates can be stacked side by side without slipping. The lower level is designed to hold one box, which can be stacked up to three high without slipping. The large, puncture-proof wheels with plain bearing guides ensure optimum weight distribution. The Delphin Alto III is suitable for harvesting crops in greenhouses, polytunnels or shelving systems.
