

The fleece winder makes it easier to grow and care for strawberries and vegetables and is suitable for unwinding and winding fleece, nets and lightweight films. The sturdy frame construction allows for pipe lengths of up to 2500 mm (item no. 1407 up to 2000 mm). The hydraulic drive and automatic spooling device are conveniently controlled from the tractor. A front loader adapter is available as an option, ideal for laying film on tunnel and hail protection systems. Ball-bearing tube supports ensure smooth running without rattling and guarantee gentle handling of fleece and film.
