FRONT-MOUNTED MULCHER FOR ASPARAGUS FOLIAGE

The front-mounted asparagus foliage mulcher is the professional solution for shredding asparagus foliage. Thanks to the arrangement of its hammer flails and the highly durable rotor, the mulcher operates cleanly and vibration-free. The 36 flails, covering a working width of 1,500 mm, deliver a reliably uniform result. Additional highlights include the adjustable opening flap toward the ridge and the spikelet lifters on both sides, which lift the asparagus foliage and enable mulching at ground level for efficient results. Optionally, the asparagus weed mulcher can be equipped with hydraulic support wheels for variable depth adjustment (Item No. 1420.01). This depth adjustment ensures that the optimal distance from the ridge crest is always maintained.
