

Coconut Growlabs are available in various sizes and are ideal for growing 8 to 10 plants per tray. The substrate mixes on offer are tested by the respective manufacturers during research and development processes for quality, aeration, drainage and porosity before being approved for professional use.

Coconut fibre mixtures are available in various grades, including unwashed, washed, buffered and nutrient-enriched. The substrate is available in both compressed and loose forms and is distributed by Metasa. Each mat has four individual dripper holes spaced 25 cm apart, each with a diameter of Ø4.0 mm. The pH value of the substrate is either 5.5–6.5.

ARTICLE-NUMBER 1700

weight*: ca. 1,4 kg

Dim. (pressed)*: 930 x 82 x 25 mm (BxTxH)

Mixture: 30% coco chips, 70% fine coco

SUITABLE FOR THE FOLLOWING CROPS

Strawberries

Raspberries

Bush berries

- + QUICK TO SET UP
- + EFFICIENT APPLICATION INTO THE CONTAINERS
- + RAPID AVAILABILITY
- + RESOURCE-EFFICIENT
- + EXCELLENT AERATION AND ROOT GROWTH
- + HIGH CROP YIELD
